

Setting your Preferences

You can set up preferences in your customer account and turn on notifications so that when a property is advertised that meets your preference, the system will notify you so you can log in and take a look.

My Preferences

This screen will allow you to set preferences for properties you would like to apply for.

You can choose to add a location, rental cost, property type and/or number of bedrooms.

Once you have entered details here, click the 'Save my Changes' button to keep these preferences. There will then be an option to search using these preferences when we go live in August.

Property Notifications

You can set up property notifications which will let you know when properties matching your preferences are advertised by clicking on the 'Notifications' button.

Notification

My Preferences

There are some further advanced preferences that you can also set which will match with property features when we begin advertising.
